Positioning Statement

I help businesses build and improve mobile apps using Android and Flutter. With 3+ years of experience across more than six projects, I focus on responsive interfaces, Clean Architecture, and maintainable code.

Education & Certifications

Mobile Computing and Smart Device Applications, *Islamic University of Gaza* 2026
Faculty of Information Technology

Services / Specialization

- Android Development with Kotlin and Jetpack Compose
- Cross-Platform Development with Flutter
- Figma-to-App Interface Implementation
- Firebase, Supabase and REST API Integration
- App Maintenance, Bug Fixes and Refactoring

Experience & Project Results

Accounting app 09/2026 – Present
Sole developer using Flutter and Supabase. Core functionality completed; offline support, customer messaging, and reports remain in development.

Bright Code 08/2025 – 10/2025
Collaborated on an Android app using Kotlin and Jetpack Compose, contributing to interfaces and assigned development tasks.

devZ
Built the Android frontend for a developer community graduation project, including Q&A, job, company, and admin screens using Clean Architecture and MVI.

Skills & Tools

Kotlin, Jetpack Compose, Flutter, Dart, MVI, Clean Architecture, Clean Code, Firebase, Supabase, REST APIs, Figma. Languages: Arabic; English (Intermediate).

Work Samples / Portfolio

English Dictionary and Daily Task Organizer
Android applications for vocabulary learning and daily task management.
